

FocalPoint Remote Edition - Process Returns On-The-Go!

Use FocalPoint's new remote access functionality to process returns away from your rental counter.

Process FocalPoint Returns from any tablet, iPad or laptop that has an internet connection and can access a web page*.

Intuitive order screens allow you to search open orders to start a return. Once an open order is selected, items can be returned and meter/fuel charges can be applied.

Remote app allows you to process credit cards and signatures during a return.

Email or reprint open contracts, reservations or quotes directly from the remote app.
