

## Work Order Label Printer

Visum offers the Work Order Label Printer, a tool that will help make any Service Department more organized and efficient.

Fully-compatible with your FocalPoint system, the Work Order Label Printer prints all of the information needed for equipment tracking by your Service Department. Info prints onto a single 3" x 4" label for attaching to your current equipment tags.

Quickly and easily track your Customer's equipment throughout the repair process from when it gets dropped off at your site, to when it is picked up.

Work Order Labels contain both text and bar-code information that has already been created in FocalPoint - no need for the headaches of double-data entry.

The compact size of the Work Order Label Printer takes up little of your valuable workspace.
