www.card-reader.com

idScan® is an easy-to-use modular application, capable of scanning a variety of personal cards such as driver licenses, ID cards, medical insurance cards, passports, visitor cards, as well as checks and photos.

idScan® is capable of reading the cards' printed information *from both sides, as well as barcodes and magnetic strips. It extracts the document's image and text data arranged in appropriate text fields into a file or the clipboard. The extracted image and data can be saved to a file or exported to any other application, email, FTP and the web.

Document types

idScan® is capable of scanning and extracting data from the following documents (also available as document-specific single modules):

- Driver license (Full text extraction)
- Driver license barcode (1D&2D pdf417)
- Driver license with magnetic strip
- Business card
- Checks
- Medical card
- Passport

Scanners

idScan® for driver license comes with a choice of high quality, twain compatible color scanners, ranging from A6 to A4, with a resolution of 600 DPI. A magnetic strip reader is also available. All scanners connect to the computer's USB port thus requiring no external power supply, and have a small footprint.

Developers

idScan® for driver license is available to developers with our standard *idScan®* utility (illustrated in the screenshot) as well as our powerful SDK tools with support for C++, Visual Basic and many other programming tools and languages.

Features

- **Fully automated scanning process**
Allows users to focus on chain-feeding media into the scanner, while image processing and data extraction take place automatically in the background.
- **Automatic page-feed detection**
Launches the scan job immediately upon the insertion of a document into the scanner.
- Documents image and data are stored locally or exported automatically.
- **Extensive export capabilities:** export to any other application, email, FTP and the web
- **Image auto alignment**
Automatically corrects incorrect card insertion.
- Capable of scanning any photo media including paper photos, ID cards, Passports, checks and even rigid plastic credit cards.
- Data is automatically extracted into appropriate text fields.
