

## Supercharge Your Investment

Visum offers a wide range of optional hardware and software products to help you make your rental business as efficient as possible. All of these products have been fully tested for compatibility and can be added to your FocalPoint system at any time.

 **FocalPoint Mobile Edition for Android and iOS devices** - Get direct access to your store's valuable information, like rental inventory availability and rates, customer contact information with dial-out ability, rental ROI and equipment history, customer balances, daily store revenue and cash drawer summaries, signature capture, email capabilities, and more.

 **Driver's License Scanner** - Scanning a customer's driver's license protects both you and your customer and saves you both time! Capture the picture AND text information from a new customer to eliminate most typing needed when setting up a new customer. For existing customers you can compare stored information to license information for extra security. A picture paints a thousand words!

 **Integrated Credit Card Functionality** - Integrated credit card functionality eliminates the need for stand-alone credit card processing equipment. Credit cards can be processed at one or more workstations simultaneously through any FocalPoint payment screen.

 **Signature Capture and Chip Card Reader** - Use the same EMV certified chip card readers to capture signatures for your contracts and process credit card payments. Credit cards can be inserted, tapped, or swiped. Units cannot be shared between PC's, and additional software integration must be purchased.

 **FocalPoint e-Signature** - With the electronic signature function you can email signature requests to your customers and receive email or text confirmation showing that the customer has signed your document. As soon as the customer signs, the signature will show on a reprint or preview of an order. Electronic signatures can be captured at any time during the transaction process, including on quotes, reservations, open and closed orders.

 **Receipt Printer** - A fast, reliable paper saving tool that belongs on every counter. If a rental or sales invoice is paid in full, print the same information on a receipt instead of a full sheet of paper. Requires network connection. Dimensions: 6.25" w x 8.5" d x 5.87" h Print speed: 8" per second.

 **Cash Drawer** - Connects to your counter PC and can be shared by several work stations, or have a cash drawer for each work station. Heavy duty latch mechanism keeps your cash and receipts secure. Available with media slots so you can put in slips without the need to open the drawer. Dimensions: 18" w x 16.7" d x 4.2" h

 **Bar Code Scanner** - Dramatically decrease the amount of time your customer has to wait at the counter. High performance technology accommodates barcode variations, faded labels, and low contrast codes. Plugs in to a USB port. Used for POS transactions. Wired and wireless models available. Wireless scanner range is 33' from base unit. Dimensions: 5.3" l x 6" h x 3.1" w. Weighs 6.3 oz. Wireless scanner range is 33' from base unit.

 **Work Order Label Printer** - Print work order tags directly from FocalPoint to help you quickly identify which rental items or customer items are awaiting repair. Prints all applicable information with regards to the repair of the item. This durable printer is reliable and easy to use, and prints labels fast!
