

## FocalPoint Email and Text Reminders

Use FocalPoint Email and SMS Text reminders to improve communication with your customers, eliminate surprises or mistakes, keep your customers on track and increase profits.

-  Automatically send out SMS Text Messages or emails based on the number of defined days before deliveries, pick-ups, reservations and invoice past due days to your customers.
-  Custom defined templates can be used to provide more information like dates and estimated time of arrival based on time windows you have entered.
-  Logs created to allow you to monitor emails and texts that were sent.
-  FocalPoint Texting can also be used for alerting your customers of completed work orders.

Please contact Visum for pricing and setup details.  
Customer is responsible for port forwarding and DNS setup.
