

The Visum Difference

***Software matters! But what about the company behind the software?
At Visum we take pride in both because we understand that FocalPoint
is only as good as we are.***

-  **Support** - Good support is hard to find...until now: Most issues are resolved the same day with a vast majority getting resolved on the first call.
-  **Dependable** - FocalPoint Software has been around for 20+ years and is stronger than ever.
-  **Not Just Another Number** - When you partner with us you become family and are treated as such.
-  **Value** - Our basic software license is packed full of premium features with no price increases in 20 years.
-  **Free Upgrades** - Tired of paying for the latest and greatest? You should be. Our standard software upgrades are made available to you at no charge.
-  **Industry Knowledge** - Majority of staff have devoted their entire career to the rental industry.
-  **Easier Transitions** - We take the stress out of conversions. Our team works hard to provide a smooth transition from your old software.
-  **User Friendly** - FocalPoint is the same, easy to use version, whether it's in the cloud or on your local server.
-  **Regular Training** - We offer free service training every month.
-  **Stay Up to Date** - Join our monthly webinars for...you guessed it, FREE!
-  **Payment Options** - Pick a payment plan that fits you. Financing is done directly through Visum on a handshake agreement. We have options with low down payments and 0% interest.
